Pursuant to the duty of disclosure as set forth in 37 C.F.R. §1.56, §1.97 and §1.98, applicants hereby disclose publications known to them which may be material to the patentability of this invention. The publications are listed on the attached Form PTO-1449. The aforesaid references are made known to the Patent and Trademark Office in compliance with applicants' duty to disclose all information they are aware of which may be material to the examination of the above-identified application. Kindly acknowledge receipt of this Statement and make the cited references of record in the subject application.

Submission of these publications does not constitute an admission that any are "prior art" under 35 U.S.C. §102 or §103, and applicants specifically reserve the right to antedate any such material as by a showing under 37 C.F.R. §1.131 or other method.

The present application is a divisional of application serial no. 09/577,780 filed May 24, 2000 (now U.S. patent No. 6,419,929), which is a divisional of application serial no. 08/995,659 filed December 22, 1997 (now U.S. patent No. 6,242,213). Certain references listed on the attached Form PTO-1449 were published after the filing date of one or more of the prior applications.

Copies of references not previously cited by or submitted to the U.S. Patent and Trademark Office in applications 09/577,780 and 08/995,659 are enclosed. According to 37 C.F.R. §1.98(d), copies of references already submitted in the parent application (from which the present application claims priority under 35 U.S.C. § 120) are not required to be submitted with the present information disclosure statement.

To applicants' knowledge, no office action on the merits has been mailed in the subject application. Thus, no fee is due for the filing of this information disclosure statement.

Respectfully submitted,

Diana K. Sheiness
